RVE File No. M2021-14**

Dear Ms. Thompson:

Remington & Vernick Engineers is pleased to present this proposal to provide continuing professional services related to the construction of a new Fire Department facility at 544 New Jersey Avenue. As you are aware, separate proposals were previously submitted and approved for pre-design services, preliminary design, construction documents, bid coordination, construction phase architectural and engineering support, and on-site construction management.

Our most recent proposal for construction phase services dated July 13, 2020 included additional on-site construction management based on an extended contract completion date of October 16, 2020. As you are aware, the date of substantial completion for this project was January 8, 2021.

This proposal is for the closeout phase of the project. The proposed services include coordination of all administrative closeout requirements to be addressed by the contractor prior to final payment. All operations manuals, warranties, and as-built drawings will be transferred to the City. Training of the City's personnel for new equipment and systems will be arranged as needed. Upon acceptance of the project, we will prepare a final payment recommendation in accordance with contract documents.

We are prepared to close out this project upon your direction and City authorization to proceed for an additional lump sum fee of **\$15,000.00**, to be invoiced monthly on a percent-complete basis.

Should you have any questions, comments, or require additional information, please feel free to contact me in our Pleasantville office by phone at (609) 645-7110 or via edward.dennis@rve.com.

Very truly yours,
