Municipal Complex, 500 Mill Road
Absecon, NJ 08201

May 13, 2021

To Whom It May Concern,

Sevenson Environmental Services will be performing construction operations as part of the of the "Maintenance Dredging and Channel Improvements for Absecon Creek Channel" project for the New Jersey Department of Transportation. Sevenson will be performing hydraulic dredging of the Absecon Creek Channel with placement of dredged sediment within the limits of the Gateway Confined Disposal Facility (CDF). The Gateway CDF is located, within the marsh just north of the Atlantic City Expressway. The approximate site address for the CDF is at 626 E. Delilah Rd., Pleasantville NJ 08232. On site construction operations are anticipated to begin May 24, 2021 and continue through December 1, 2021. Limited excavation activities are planned at the Gateway site and include installation of pilings and cribbing to support an elevated outfall pipe. This work will occur during Site Preparation. Appropriate utility location surveys will be performed prior to excavation activities. Major aspects of work and their anticipated time frame are listed below.

Site Preparation	May 24, 2021 through July 2, 2021
Dredging	July 6, 2021 through October 25, 2021
Demobilization	October 23, 2021 through December 1, 2021

Please contact the Project Manager, Ben Tomkins, or the Project Superintendent, Douglas Pike, if in need. Contact information will be provided below.
